Professional Summary

MERN Stack Developer with 2 years of experience developing and maintaining enterprise FinTech web applications using React.js, Node.js, Express.js, MongoDB, JavaScript, and REST APIs. Experienced in full-stack development, API integration, enterprise reporting, reusable PDF template development, application performance optimization, production support, and Agile software development. Familiar with client onboarding, entity management, KYC/AML compliance, workflow automation, financial reporting, and regulatory workflows.

Experience

Longshore Labs Pvt Ltd

Sep 2024 – Present

Associate Software Developer

Chennai, Tamil Nadu

- Develop and maintain enterprise FinTech applications using React.js, Node.js, Express.js, MongoDB, JavaScript, and REST APIs in an Agile development environment.
- Design and develop a configurable enterprise reporting framework supporting investor, compliance, screening, beneficial ownership, transaction statement, and billing reporting workflows.
- Build reusable PDF templates with dynamic field mapping, conditional rendering, validation, formatting, and export functionality for financial and compliance reporting.
- Implement client, entity, and contact onboarding workflows by integrating KYC, AML, PEP, sanctions screening, document processing, validation, and workflow automation.
- Collaborate with cross-functional teams to deliver scalable features, troubleshoot production issues, and optimize application performance.

Longshore Labs Pvt Ltd

Jun 2024 – Aug 2024

Intern Developer

Chennai, Tamil Nadu

- Contributed to MERN stack web application development by developing features, implementing REST APIs, debugging issues, and supporting application maintenance.
- Collaborated with senior developers using Git and Agile methodologies while gaining experience in software architecture, SDLC, code reviews, testing, and debugging.
- Developed FinTech domain knowledge in client onboarding, entity management, KYC/AML compliance, workflow automation, financial assets, and business processes.

Projects

Library Management System (REST API) | *Node.js, Express.js, MongoDB, REST APIs, Postman*

- Developed a RESTful Library Management System using Node.js, Express.js, and MongoDB.
- Implemented CRUD APIs, validation, error handling, and API testing using Postman.

Technical Skills

Frontend: JavaScript, HTML5, CSS3, React.js, Tailwind CSS

Backend & Databases: Node.js, Express.js, MongoDB, REST APIs

Technologies: Git, GitHub, Postman, VS Code, Azure DevOps, React-PDF, Agile, SDLC, Code Reviews, Testing, Debugging

ACHIEVEMENTS

Technical Mentor

June 2026 – July 2026

Longshore Labs

- Mentored 2 software engineering interns on coding standards and project workflows.
- Led the Summit project to normalize Indian, Foreign, and LLP entity data into a standardized financial data model.
- Guided the implementation of Medallion Architecture using Bronze, Silver, and Gold data layers to improve data quality and analytics readiness.

Education

Government College of Engineering – Srirangam

August 2020 – June 2024

B.E. Computer Science and Engineering, CGPA: 8.4/10.0

Trichy, Tamil Nadu
